Project Structure	95 / 100	Excellent
Commit Quality	74 / 100	Good
Documentation	95 / 100	Excellent
Code Quality	94 / 100	Excellent

Actionable Recommendations

Improve README documentation [HIGH]

Evidence: Important README sections are missing.

Add or improve missing README sections: Overview / Business Problem, Installation instructions, Architecture / Features, API / Documentation.

Remove production debug statements [MEDIUM]

Evidence: Detected leftover print/console.log statements in 3 files.

Replace temporary print or console debug statements with structured application logging where necessary.

Use descriptive commit messages [LOW]

Evidence: Found 2 generic/vague commits.

Replace generic commit messages with clear action-oriented descriptions of the actual change.

Avoid repeated commit messages [LOW]

Evidence: Found 1 instances of repeated commit messages.

Write commit messages that describe each individual change instead of repeatedly reusing the same message.
